

The Mission

To bring a fun and positive environment back to De-Fi whilst providing a simple, safe and rewarding avenue to earn passive income at the click of a button.

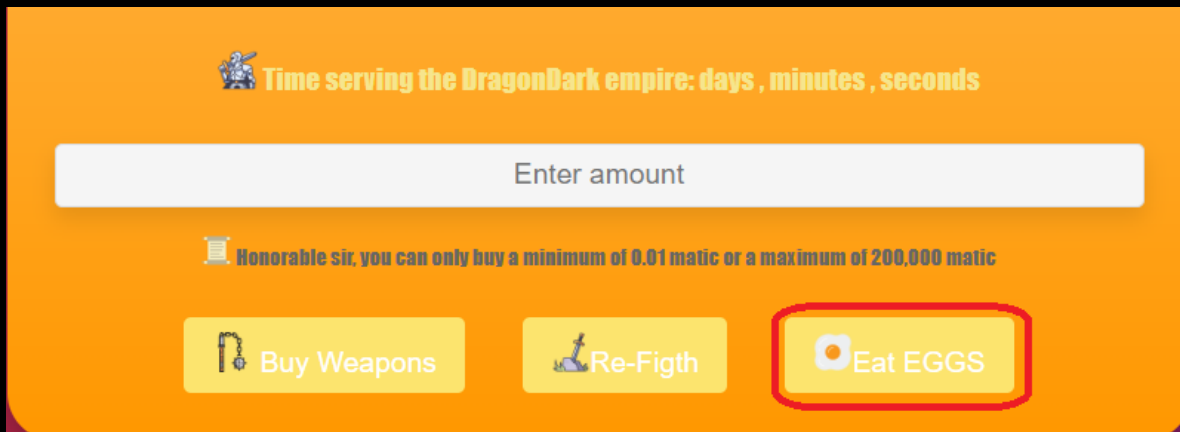

The Vision

We created this application with the vision that it would be interactive, allowing you to reinvest or withdraw your earnings with just one click.

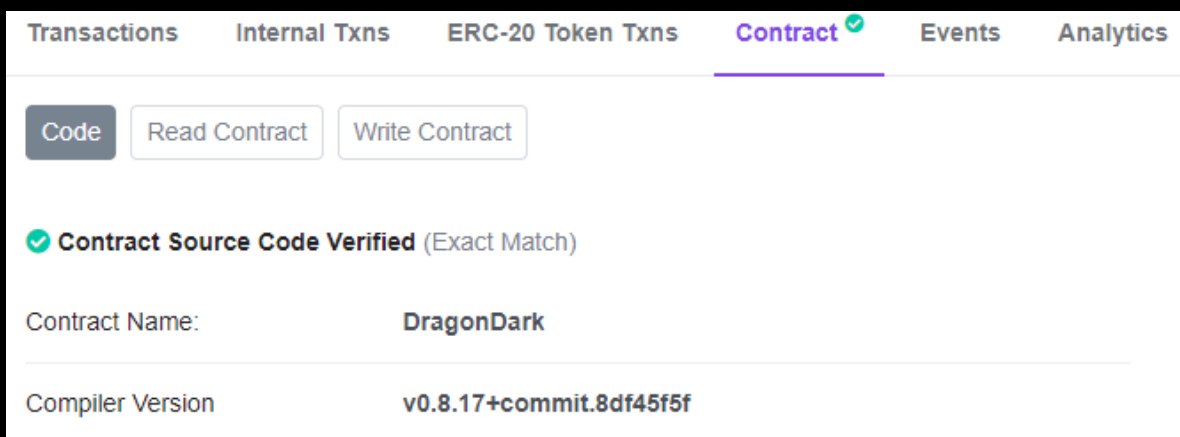

You can Re-Fight from a minimum of 10 Matic. Re-Fight means reinvesting your earnings.

With a simple click, you can withdraw your earnings without any ifs, ands, or buts in Eat Eggs.

Our contract is 100% verified and no type of proxy is being used to modify any function and withdraw the locked TLV, so your funds will be completely safe here. The TLV is locked and there will be no inconvenience if it reaches 0.

We are not a cheap copy of BakedBeans that deceived its users with a proxy and withdrew the TLV. We did not create any proxy or have access to withdraw the funds.

How to Access

The Dragon Dark dApp will need to be accessed via your Web3 browser or wallet extension. Metamask via a ledger hardware wallet is recommended for maximum security and seamless use. Standard Metamask and Trust Wallet extensions can also be used. ***As a reminder, never share your seed phrase with anyone***

Please ensure that you always use verified links found on the official channels and social links provided below for ease of use!

Basic Functions

The steps for using Dragon Dark dApp are simple, easy and effective. With only three buttons on the dApp, if you can run a computer, you can keep up to the game.

Buy Weapons: Used during your initial investment

Re-Fight: Used to compound your investment

Eat Eggs: Earn that Cold Hard \$\$\$\$\$ MATIC \$\$\$\$\$

Buy Weapons

When baking your Matic on the dApp, the smart contract will deposit your Matic into the TVL (into the contract). The Matic Buy Weapons into the TVL is locked, it will be returned via the "My rewards" section of the dApp. Next you will receive "EGGS" which ultimately act as the number of tokens you own. These "EGGS" will automatically kick start your path towards passive income generation. The minimum deposit for Buy Weapons is 0.01 Matic. ** Please note if using a referral code for a deposit, the referral code used **MUST** be invested into Dragon Dark dApp!!!

Re-Fight

The Re-Fight function will be available once your rewards have begun to accumulate. It is a requirement to accumulate 10 Matic before being able to Re-Fight; this is to ensure the Polygon gas fees are not higher than the Re-Fight amount (automatically derived within the smart contract). Once that time has come you will be able to use the "The Re-Fight" button to compound your rewards into the locked TVL. Once this function is initiated your rewards counter will restart to zero and your "EGGS" amount will

increase. The increase of EGGS will be determined by amount in TVL combined with how many rewards are Re-Fight.

Eat Eggs

The Eat EGGS function is simply put why all investors join this project. This is where your hard-earned Matic gets returned to your aforementioned Metamask or Trust Wallet so you can go buy real life EGGS...or maybe a Lambo! The amount received will vary depending on which day you decide to eat and will be explain later in the whitepaper. The only transaction fees apart from the "haseggs" tax will be the standard gas fees which are in place on the Polygon network.

Marketing - 2% on Buy Weapons | 5% on Eat Eggs

3%* Static Daily Rewards - You earn 3%* daily on the amount of "EGGS" you hold within the project. As you Re-Fight and TVL increases, so do your rewards.

Referral System

It will pay 5% reward for each referral that invests \$200 in Matic.

Max Wallet

200,000 Matic Max per Wallet.

"HasEGGS" Tax

The "HasEGGS" tax punishes those who are out for themselves and encourages investors to play the game and sustain the project. The "HasEGGS" tax works as follows:

Day 1 - Eating EGGS incurs 90% Loss (0-24 hours)

Day 2 - Eating EGGS incurs 80% Loss (25-48 hours)

Day 3 - Eating EGGS incurs 70% Loss (49-72 hours)

Day 4 - Eating EGGS incurs 60% Loss (73-96 hours)

Day 5 - Eating EGGS incurs 50% Loss (97-120 hours)

Day 6 - Eating EGGS incurs 40% Loss (121-144 hours)

Day 7 - Eating EGGS incurs 30% Loss (145-168 hours)

Day 8 - Eating EGGS incurs 20% Loss (169-192 hours)

Day 9 - Eating EGGS incurs 10% Loss (193-216 hours)

Day 10 - No Loss incurs | Standard fees (216-240 hours)

Day 11 - Resets back to Day 1

Please note: Any 'Eat' within this time period will reset your timer back to Day 1

Max Withdraw is 300% of MATIC deposited per wallet Example: Mr. princess deposits 1 Matic, his wallet will only be able to withdraw 3 Matic from the TVL. If Mr. princess deposits 1 Matic on day 1 and 14 Matic on day 23, his wallet will only be able to withdraw 45 Matic from the TVL.
